### **Unisem Receives Collaboration Award from Maxim Integrated Products**

Kuala Lumpur, 13 January, 2012 – Two members of Unisem’s team in its Chengdu, China factory recently received Collaboration Awards for outstanding support from customer Maxim Integrated Products. These awards were presented to Alfred Lee (Senior Manager – IT) and Leala Li (Customer Service) for working with the Maxim team on a project to improve their vendor tracking systems.

Maxim Integrated Products, Inc. designs, develops, manufactures and markets a broad range of linear and mixed-signal integrated circuits, commonly referred to as analog circuits, for a large number of customers in diverse geographical locations. Maxim develops and markets both proprietary and industry-standard analog integrated circuits that meet the increasingly stringent quality and performance standards demanded by customers.
