### **Unisem Europe Receives Recognition Award from Ember**

**Kuala Lumpur, 30 July, 2008** – Unisem Europe recently received a Recognition Award from its customer Ember. Unisem’s facility in Wales was given this award in recognition of the factory’s contribution toward helping Ember reach a market leadership position in the Zigbee market. “On behalf of Ember, I wish to extend our thanks to Unisem for assistance in helping us ramp our business. It took Ember 3 years to ship our 1<sup>st</sup> million chips, just 1 year our 2<sup>nd</sup> million and amazingly only 5 months to ship our 3<sup>rd</sup> million. Unisem’s support has helped us grow rapidly! We look forward to your support of our future growth, utilizing both the Chengdu and South Wales facilities,” added Keith Batchelder (VP Operations). The award was accepted by Salem Belmeguenai (Unisem-Eu GM), “This is a honor to receive this award in recognition of the support provided by the Unisem-Eu team to Ember and we look forward to our continuous collaboration and growing business with Ember”.

Ember Corporation develops ZigBee wireless networking technology that enables companies involved in energy technologies – enertech – to help make buildings and homes smarter, consume less energy, operate more efficiently, and keep people comfortable and safe. Ember’s low-power wireless technology can be embedded into a wide variety of devices to be part of a self-organizing mesh network. Ember is headquartered in Boston and has its radio development center in Cambridge, England, and distributors worldwide. The company is a promoter and Board member of the ZigBee Alliance and its platform is the “Golden Suite” for 802.15.4/ZigBee interoperability testing.
