### **Unisem Receives 2015 Best Supplier Award from Skyworks Solutions**

**Kuala Lumpur, 17 March 2016** – Unisem was recently honored with the 2015 Best Supplier Award from its strategic customer Skyworks Solutions. Skyworks is one of the world's leading manufacturers of high performance analog semiconductors that are empowering the wireless networking revolution. Their devices are used across many applications including automotive, broadband, cellular infrastructure, connected home, industrial, medical, military, smartphone, tablet and wearables. This award recognizes the outstanding service and support Unisem has provided to Skyworks throughout 2015.

Skyworks evaluates each of their vendors in the areas of commercial performance, quality and process capability to determine which supplier has performed the best. The combinations of excellent scores in each of these areas by Unisem is why they were given this prestigious award.

Upon receipt of the award, Mr. HL Lee, Group COO of Unisem commented, "We are honored to receive this award from Skyworks. Over the past few years we have built a strategic partnership with Skyworks and this award shows that Unisem is providing the highest quality of service and support for this key customer."

#### **About Unisem**

Unisem is a global provider of semiconductor assembly and test (OSAT) services for many of the world's most successful electronics companies. We offer an integrated suite of packaging and test services such as wafer bumping, wafer probing, wafer grinding; a wide range of leadframe and substrate IC packaging; wafer level CSP; and RF, analog, digital, and mixed signal test. Our turnkey services include design, assembly, test, failure analysis, and electrical, mechanical, and thermal characterization and modeling. The company has factory locations in Ipoh, Malaysia; Chengdu, People's Republic of China and Batam, Indonesia. Unisem is headquartered in Kuala Lumpur, Malaysia.
